REVENUE MODEL

We Generate Revenue

Bussiness to Bussiness

The diagram features four circular nodes on a white background. A large brown circle at the bottom left is connected by dashed lines to three yellow circles: one above it, one to its right, and one below that. The yellow circle to the right is further connected to another yellow circle above it. Each circle has a dashed line extending from its edge, creating a network-like structure.

Bussiness to Customer

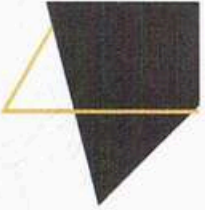

Perproject

OUR VALUE PROPOSITION

It is a statement that defines the unique benefits it offers to its clients and distinguishes it from its competitors. It should clearly articulate what the company does and why it's the best choice for customers looking for construction services. our expertise, experience, quality of work, commitment to customer satisfaction, competitive pricing, and innovative solutions, among other factors. The goal of a value proposition is to build trust and credibility with potential customers and to clearly communicate why the company is the right choice for their construction needs.

We take pride in providing our clients with high-quality construction services that meet or exceed their expectations.

AIM TO SCALE UP

Investment in technology:

- The use of cutting-edge technology can increase efficiency and productivity, reducing costs and increasing profits.

Expansion of services:

- Offering additional services, such as project management and design, can attract new clients and increase revenue streams.

Diversification:

- Diversifying the types of projects the company works on can help to reduce risks and increase profitability.

Growing the workforce:

- Hiring additional skilled workers can help to increase capacity and complete projects more quickly.

UNIQUE SELLING POINT

- We provide a container gardening facility that helps in maintaining temperature.
- We have developed a Rain Water Harvesting facility to conserve water and reduce the wastage of water.
- We also use temperature control colors for coloring the walls which keep the room cool.
- On schedule, we are providing service and maintenance. The timely delivery of goods, equipment, and labor is guaranteed. We assure the timely completion of all work and services.
- All of our products and machinery come with a quality assurance promise. Besides selling high-quality products and tools, we also offer repair and maintenance services with a 100% satisfaction guarantee.

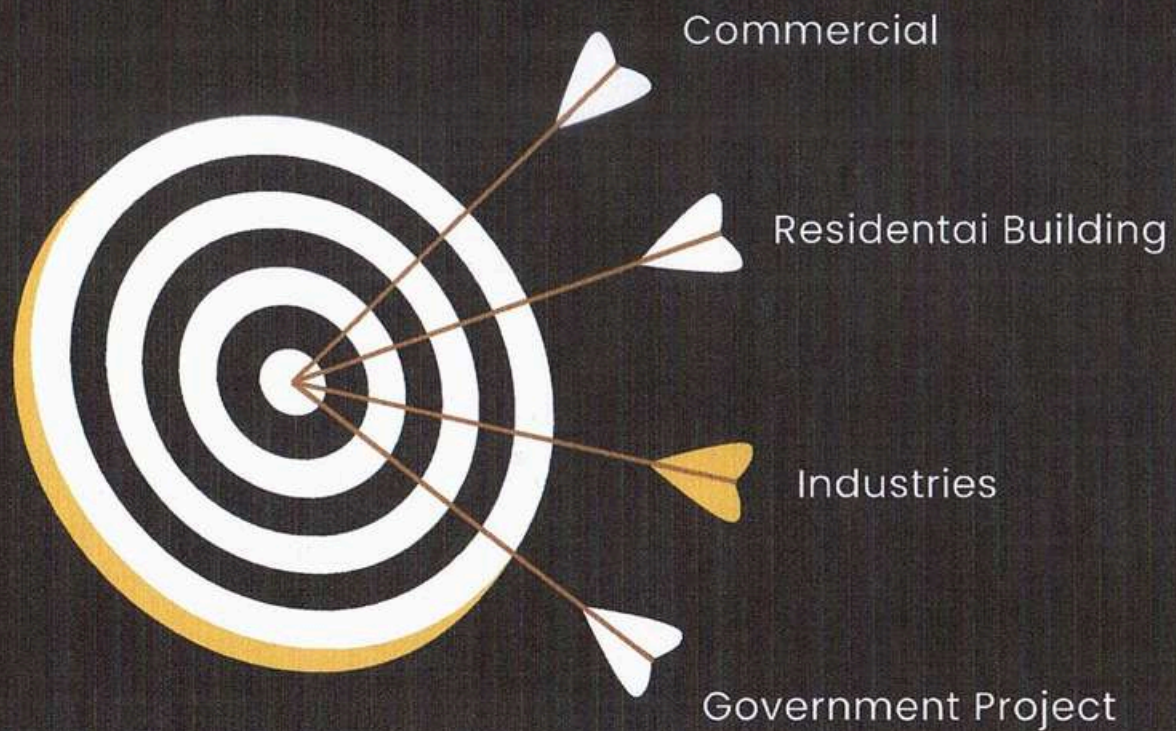

- [illegible]

- The India construction market size was valued at **\$609.8 billion in 2021** and is expected to achieve an AAGR of more than **6%** during 2023-2026. 

TARGET MARKET

SOLUTIONS

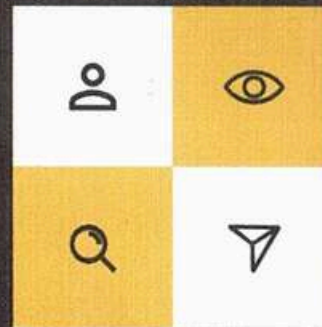

If your company is in need of workers with unique abilities, we can help fill that gap. Projects that call for specialised skills or knowledge may benefit greatly from this.

01

Protective barriers such as safety cones, barriers, and warning signs can help keep workers and the public safe by preventing access to hazardous areas.

03

02

Providing workers with the right safety equipment such as hard hats, steel-toed boots, and reflective vests can help prevent accidents and keep workers safe.

04

Proper waste management solutions such as dumpsters and recycling bins can help keep construction sites clean and organized.

PROBLEMS

01. POOR EFFICIENCY:

- Inactivity brought on by inadequate or late supply shipments
- Construction vehicles breaking down
- Weather that is frequently out of season
- Emerging design issues during construction
- Conflict between the different stakeholders (owner and contractor)

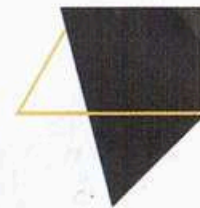

02. PLANNING DIFFICULTIES:

- Lack of qualified employees.
- There is no irreversible planning.

03. LACK OF MATERIAL:

- Construction material costs increase daily as a result of things like record market highs, growing raw material costs, and competition.

Thank You.
